EDUCATION

NMAM Institute of Technology, Nitte
Bachelor of Technology in Robotics and Artificial Intelligence

Nitte, Karnataka
2022 – 2026

Relevant Coursework: DSA, Machine Learning, Deep Learning, Computer Vision, DBMS, Web Development

EXPERIENCE

Manipal Institute of Technology | C# Developer Intern

June 2024 – July 2024

C#, .NET Framework / .NET Core, Microsoft SQL, Visual Studio, Git, REST APIs

- Developed and maintained backend functionality for internal helpdesk software using C#, .NET Framework / .NET Core, and REST APIs.
- Worked with Microsoft SQL to query, manage, and integrate application data with backend services.
- Implemented and tested API endpoints, troubleshooting integration and data-flow issues across backend components.
- Used Visual Studio and Git for debugging, version control, and iterative delivery in a collaborative development environment.

PROJECTS

SceneTheory – Full Stack Movie Discovery Platform [GitHub](#) [Live](#) | *React.js, JavaScript, Node.js, Express.js, MongoDB, REST APIs*

- Built a full-stack movie discovery and recommendation platform with authentication, personalized recommendations, and interactive community experiences.
- Implemented end-to-end user authentication and authorization with signup, login, protected routes, and authenticated user workflows.
- Integrated the TMDB API across movie metadata, ratings, genres, trailers, similar movies, and detailed movie information.
- Developed multiple engagement workflows including quizzes, recommendations, trailer previews, community posts, CineChallenges, and streak tracking.

Floatify – Agentic AI IPO Analysis Platform [GitHub](#) [Live](#) | *React.js, Vite, Node.js, Express.js, Groq API*

- Built a full-stack Agentic AI platform that analyzes IPOs through a multi-agent pipeline covering finance, GMP, research, sentiment, risk, YouTube research, and final decision analysis.
- Integrated Groq-powered LLM inference with structured agent outputs to generate explainable investment recommendations, confidence scores, risk levels, listing-gain expectations, and investment horizons.
- Developed an interactive React dashboard with live research progress, evidence, AI reasoning, recommendation metrics, and market-focused visualizations; deployed the frontend on Vercel and backend on Render.

HACKATHON

Voxlate – AI-Powered Multilingual Meeting Assistant *36-Hour Hackathon* | *React.js, Vite, Tailwind CSS, Node.js, Deepgram, Generative AI*

- Built Voxlate in a 36-hour hackathon as an AI layer for existing meeting platforms, focused on real-time multilingual communication.
- Developed live speech-to-text, real-time translation, decision detection, meeting summaries, and multilingual voice workflows.
- Integrated frontend, backend, speech processing, AI services, and real-time communication under a strict 36-hour delivery window.

TECHNICAL SKILLS

Programming: Python, JavaScript, C#, Solidity

Frontend: React.js, Next.js, Vite, Tailwind CSS

Backend: Node.js, Express.js, REST APIs

AI / ML: Generative AI, Agentic AI, LangChain, RAG, PyTorch, OpenCV, YOLO, DeepLabV3+

Databases: MongoDB, PostgreSQL, MySQL, Microsoft SQL

Web3: Web3.js, Solidity

Tools: Git, GitHub, VS Code, Jupyter Notebook, MATLAB

CERTIFICATIONS

Claude AI – Anthropic

July 2026

- Generative AI, LLMs, prompt engineering, Claude API, AI-assisted development, context-aware workflows, structured outputs, and responsible AI.

Introduction to Cloud Computing – CognitiveClass.ai

June 2025

- Foundational knowledge of cloud computing models, services, deployment types, and IBM Cloud architecture.
